EXPERIENCE

Baker Tilly – Tysons Corner, Virginia

Digital Solutions Intern, Intelligent Automation

Jun. 2026 – Present

- Built UiPath automation paths that map triggers, input validation, selectors, branching logic, exception handling, and user handoffs for repeatable business workflows.
- Built AI-assisted process maps and reusable workflow components to translate manual work into technical RPA requirements
- Documented reusable UiPath components, workflow assumptions, and testing notes to support automation handoff, future implementation, and Intelligent Automation team review.

Colonial Webb – Richmond, Virginia

Web Refresh Intern

May. 2025 – Aug. 2025

- Redesigned 60+ service and marketing pages to improve layout, responsiveness, accessibility, and user flow
- Diagnosed cross-browser form submission issues with Chrome DevTools and backend configuration updates, increasing service inquiries by 47%
- Built a browser-based image converter that compressed and converted assets to WebP for faster media workflows

Campus Collect – Blacksburg, Virginia

Full Stack Software Engineer Team Lead

Jul. 2024 – Sep 2024

Full Stack Software Engineer Intern

Jun 2024 – Jul 2024

- Migrated 20+ front-end components from CSS to Tailwind CSS, improving UI consistency and reducing styling overhead
- Led 7 front-end developers through Trello sprint planning and bi-weekly code reviews, increasing task throughput by 200%
- Proposed new product features during investor pitch sessions, translating user and business requirements into frontend work
- Authored OpenAPI and ReDoc documentation for password, user, and post authorization workflows to speed backend onboarding
- Researched and integrated Redis caching to reduce backend response time and improve perceived load speed by about 30%

Projects

FlipDar | flipdar.com

Next.js, Tailwind CSS, Supabase, SQL, Stripe, Vercel

Jul 2025 – Present

- Built a full-stack marketplace analytics platform that collects resale listings, normalizes item data, and surfaces high-margin opportunities
- Implemented Next.js API routes with Supabase authentication, SQL-backed storage, and protected server-side data access
- Released FlipDar mobile app on the iOS App Store, helping grow the product to 1,000+ users and 100,000+ impressions across web and mobile.
- Integrated Stripe checkout, payment status handling, protected feature access, and deployment configuration to support premium analytics in a production-ready SaaS workflow.

Image Converter

JavaScript, Next.js

Jul 2025

- Built a Next.js tool to bulk convert, compress, and rename images to WebP for platform compatibility and faster asset delivery
- Added drag-and-drop uploads, client-side validation, and export controls to support repeatable media optimization

EDUCATION

Virginia Tech – Blacksburg, Virginia

Expected May 2027

Bachelor of Science, Computer Science; Cumulative GPA: 3.62/4.0; Major GPA: 3.73/4.0

Relevant Coursework: Data Structures and Algorithms, Computer Systems, Intermediate Software Design, Machine Learning, Intro to Artificial Intelligence, Mobile Software Development, Web Application Development, AI Tools for Software Engineering, Computer Science Capstone, Comparative Languages

Skills

Programming Languages: Python, JavaScript, TypeScript, Java, C, Go, SQL, HTML, CSS

Frameworks & Databases: Next.js, React, Tailwind CSS, PostgreSQL, MongoDB, Redis, FastAPI

Tools & Software: Git, GitHub/GitLab, Docker, UiPath, Vercel, Figma, OpenAPI, ReDoc, Power BI

Technical Skills: Full-Stack Development, API Integration, Authentication, Web Scraping, Data Visualization, Dashboard Development, Responsive Design, RPA Workflow Design, Process Automation, Technical Documentation, Agile Development, Prompt Engineering, State Management, Project Management, Redux
